EDUCATION

The University of Texas at Dallas, Richardson, TX

May 2027

Bachelor of Science, Computer Science

Relevant Coursework: Computer Science II, Introduction to Computer Science and Software Engineering, Computer Architecture, UNIX Programming

EXPERIENCE

Yogik Roots, Round Rock, TX

May 2023 - Present

Internship

- Developed a model e-commerce website using WooCommerce for the sale of various spice and ingredients
- Conducted extensive SEO analysis that improved organic search rankings, leading to an increase in website traffic and enhancing brand visibility across digital channels.

Leap4Ward, Round Rock, TX

Jun 2023 - Aug 2024

Tutor

- Designed and delivered individualized lesson plans for 30+ students, emphasizing logical reasoning, problem-solving, and critical thinking skills foundational to STEM fields.
- Designed and implemented tailored lesson plans for over 30 students, boosting critical thinking and problem-solving abilities foundational to STEM fields, resulting in a 25% increase in overall academic performance.
- Elevated student engagement levels by integrating real-world applications of advanced mathematical concepts like algebra and trigonometry into daily lessons.

PROJECTS

- **Quizbowl Mobile:** Quizbowl is a trivia based game, and this app was developed so students could study for tournaments on their devices. It includes a database search, a tossup section, and a bonuses section.
 - Developed using React Native
 - Used Tamagui for styling
 - Used Zustand to setup global state management across screens
 - Used Expo Router to separate different screens into different TypeScript files
 - Used React Native Async Storage to persist settings and stats across app restarts
 - Used UseInterval Hook from usehooks-ts to add words to questions every .5 seconds
- **Outfit Generator:** Stores a users closet and uses AI and various settings to randomly generate outfits based on the user's algorithm
 - Developed using JavaScript
 - Uses Llama LLM
 - Based off MERN Stack (MongoDB, Express.js, React, Node.js)
 - UI made with Tailwind CSS
- **AI Fitness Trainer |** Next.js, React, Tailwind & Shadcn UI
 - Developed a browser-based fitness app using PoseNet to track body movements.
 - Integrated TensorFlow.js for real-time feedback during workouts.
 - Designed an interactive UI to create a simple way to track progress.
 - Uses Gemini API integration to create user-tailored workout programs
